

BMIS

BATTERY MANAGEMENT INFORMATION SYSTEM

Midtronics Battery Management Information System is a fully customizable, web-based data analysis and reporting service designed to make your equipment, staff, and processes more profitable and effective.

BMIS Offers Value in Key Areas

Warranty Management

- Improved compliance with process management and enforcement
- Inventory management of batteries and vehicles at store locations
- Constant access to required codes for warranty claims
- Vehicle lifecycle history

Preventative Maintenance

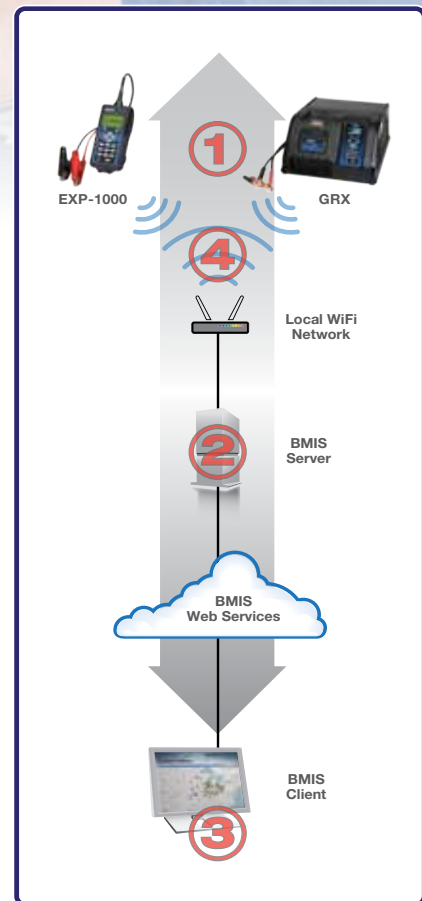

- Increase battery sales by driving preventative maintenance testing
- Improved compliance through management tool reporting level of testing

Customer Service

- Vehicle history information available to improve customer's service experience
- Specific vehicle data to monitor problem vehicles
- Ensure that battery test procedures are being followed by individual technicians

Asset Management

- Track all tools in the field and identify non-functional equipment
- Equipment usage information
- Wireless software updates

The BMIS battery and electrical management reporting system is designed to provide:

- ① Centralized collection of data from performed battery and electrical testing from multiple sources
- ② Test data analysis
- ③ Web-based reports for review
- ④ Automatic software updates for test equipment in the field

BMIS Reporting

BMIS reports are designed to enhance battery management programs and drive improvements in processes and programs.

Customized, easy-to-read, web-based reports from tester and charger data eliminate the need for analysis of raw spreadsheets.

Equipment Tracking Report

Provides tracking of equipment, showing locations and if each tool has reported in.

Vehicle Lifecycle

Provides a diagnostic history showing all test records of a specific vehicle.

Process Performance

Helps track process compliance by showing level of testing across all tools.

Inventory Management

Supports proper maintenance of batteries in stock by displaying batteries that need to be tested or charged.

Test Results

Promotes battery sales by identifying opportunities to replace batteries.

Technician Performance and Technician Test Results

Provide location-level reports to show how well testing and processes are being followed at specific locations.

Warranty Lookup

Allows the user to search for specific warranty test records.
